

MOV Stool SEATING

ADAPTABLE SOLUTIONS FOR LEARNING WITHOUT BOUNDARIES

LET 'EM MOVE!

Research shows that children who are more active exhibit better focus, faster cognitive processing and higher memory retention than those who spend the day sitting still. These adaptable seating options work in collaborative areas or as alternatives to traditional desk seating.

Padded Seating Surface

The padded seating surface utilizes a durable non-skid thermoplastic rubber that is scratch and scuff resistant.

Easy to MOVE

The reinforced polypropylene shell is durable and lightweight which makes it easy to move while sitting and easy to move around the room.

Stable

With a wider stance, the Alphabet MOV stool is stable and safe to use.

Active Movement

MOV is an active stool that promotes user movement and activity. Students love to move and MOV supports them in a fun, productive way.

Reinforced Poly Shell

available colors

Rocker Base

The convex base design allows students the freedom to move in all directions and the non-skid thermoplastic rubber base provides great traction and keeps the stool from sliding.

Seat Heights

Alphabet MOV stools are available in 14", 16", 18" and 20" seat heights.
